

SkewDriver Products

The SkewDriver is the original bevel-gear drive tool, based on a patented offset screwdriver design. Using the rotary action of a straight screwdriver through precision hardened bevel gears, the SkewDriver gets into those hard to reach places where regular drivers can't fit. It replaces ordinary finger-ratchets, stubby screwdrivers, and awkward S-bend offsets to speed work time and improve efficiency, solving those impossible access problems.

Model SP-1001 bevel-gear offset driver with removable handle List Price \$85.00

Model SP-300 bevel-gear offset driver List Price \$73.00

Heavy-duty die-cast construction with hardened gears and rings
Removable comfort grip handle permits use with all 1/4" hex cordless drivers
Integrated Snap-Cap storage compartment
12 position stabilizer wing provides ergonomic control
Made in the USA with a lifetime warranty

Model HD90

heavy duty 90° drive head

List Price \$145.00

The HD90 is a 90° bevel gear offset drive head, featuring heavy die cast metal construction, hardened steel gears and shafting with sealed ball bearing support, quick release magnetic drive chuck, and a multi-position adjustable handhold stabilizer arm with a soft tactile rubber grip. Designed for use with high power 14 or 18 volt cordless rotary drill / drivers and suitable for driving any 1/4" quick release hex drill or screwdriver bit accessory, the HD90 will handle input torque up to a maximum of 500 in-lbs.

Mechanics Gloves

Ringers® Split-Fit Air Glove

Features strategically placed gel pads in the palm to absorb harmful impact from tools such as impact guns, wrenches and air tools

It has 200% more gel than any other glove in the market plus a unique split palm design putting .012 thicker material in all the high wear areas

List Price \$55.00
